

R. L. Laughlin & Co., Inc.

Gary Sergent, Madison Bissell, David Canterbury, and Stephanie Hamilton

## OOGA 2011

Ohio Oil and Gas Association on March 9th- 11th was a great meeting and show! Fabulous attendance and good participation! Customer attendance at the R. L. Laughlin & Co., Inc. booth was the best ever with focus on remote scanning and new products that are available this year. For the first time since retiring Ron Laughlin was able to attend along with: David Canterbury, VP/General Manager; Gary Sergent, Operations Manager/Ohio Manager; Elijah Kelley, Manager Field Services; Tom Hunter, Business Manager; Stephanie Hamilton, Executive Assistant and Madison Bissell, Integrator/Admin Intern. The opening of the Hartville, Ohio office was one of the main topics, with emphasis on a full services opportunity for all of Ohio!

April 2011

### New Hires:

#### Charleston

[Josh Bucklen](#) - Josh currently lives in Cross Lanes with a planned move this summer to Lakeview in Nitro. He attends the Ohio Street Church of God in

Madison Bissell and Elijah Kelley

## Remote Communications:

Our moms taught us, it wasn't nice to brag on ourselves.....but, I can't help it!! I want to let all in the industry know, we have successfully installed ANOTHER field with 367 Totalflows, 100% wireless communications, using FREEWAVE RADIOS!!! With these radios and a couple cell modems this info can be transmitted anywhere needed.

How would you like to be able to see the tubing and casing pressure from the comfort of your office? We can make that happen! By using IO radios, we can be in and out in a few hours!

No job is too big or too small for us! Let us monitor your compressor and we will be sure to increase your production. We also have the ability to host your data online. I know some of you are saying, "That's just what my BOSS needs". Think about this, if production increases 25%, He will be more likely to give you a good raise. Give us a call and let us explain.

The FreeWave Technologies FGR2-IOS 30 volt IO radio provides outstanding performance and versatility in wireless transmission of process-control signals. The FRG2-IOS provides long range, remote control and monitoring of tanks, lifting stations, pumps, flow meters, fluid levels, water sources, temperatures and pressures typical of the oil and gas industries.

Eliminating the need for signal wire connections at the master and thereby greatly reducing costs, the FGR2-IOS can deliver data from remote analog and digital sensors over a wireless link to a remote terminal unit (RTU) or programmable logic

South Charleston and is involved in several ministries. Josh is attending WVSU studying Computer and IT Technology. He would like to thank Kathy Jordan for referring him to RLLCO.

Ramona Hayes - Mona as she calls herself is married to Richard Postlewait, they have a 19 month old son, Dakota. She is from the Clendenin/Elkview area and graduated from Herbert Hoover H.S. in 1990. Mona enjoys camping, travel, photography, Harley's and time spent with her son.

## New Hires:

### Hartville

Brandon Shoup - Brandon has lived in the New Philadelphia, OH area all his life and graduated from the Buckeye Career Center in 2000. He has been in the oil and gas industry for four years and plans to build his future with RLLCO.
